

What might you see in your child's classroom?

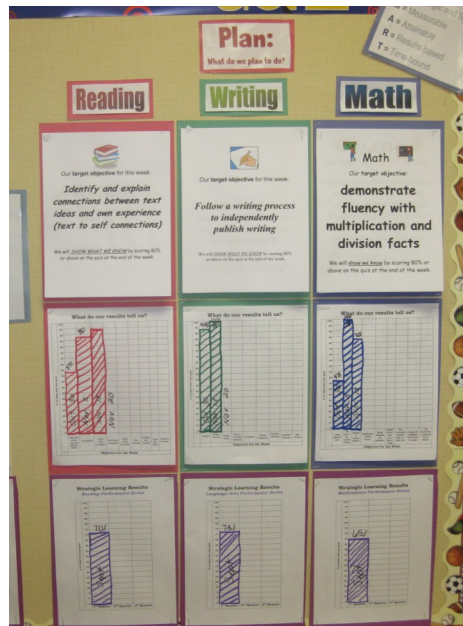

In a CCI classroom you will see:

- A classroom mission statement
- Norms for behavior and expectations
- Goals and measures aligned to learning standards
- A chart indicating class progress
- Plan, Do, Study, Act board which includes a targeted objective for the week
- A graph of learning results
- A plus/delta of previous learning (what's working and ideas for improvement)
- Plan for the week (what the students will do and what the teacher will do)

How can parents and families support the improvement process?

- Discuss with your child the weekly goal his or her class has set.
- Ask your child what he or she is learning and how he or she learns best.
- Celebrate with your child not only when goals are met, but when progress is made.
- Provide feedback to your child's teacher on your child's learning process.
- Ask questions to learn more about the process.
- Volunteer to help at school to support learning activities.

David Harrison Elementary- A Continuous Quality Improvement School

Join Us On Our Continuous Quality Improvement Journey

David Harrison Elementary has the privilege of being a Continuous Quality Improvement (CQI) deployment school. We are implementing Continuous Classroom Improvement (CCI) school-wide.

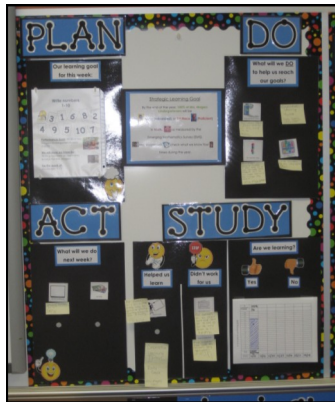

CCI is a vehicle utilized to increase student engagement and student achievement.

Continuous Classroom Improvement (CCI)

What is CCI?

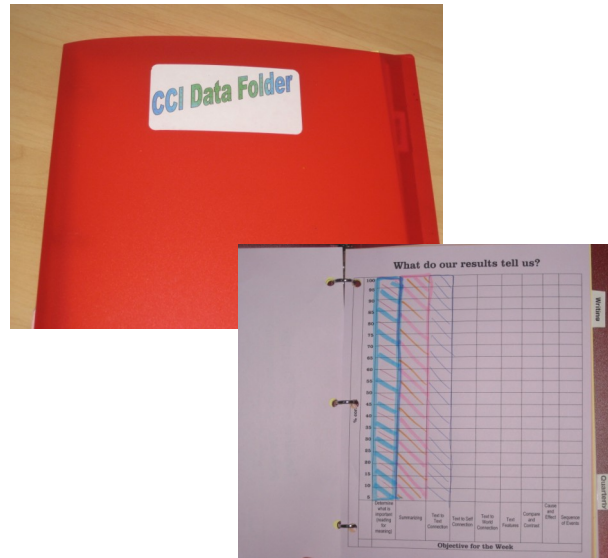

CCI (Continuous Classroom Improvement) is a continuous process that helps students give input into what works and what needs to be improved on a weekly basis. Teachers and students chart the results of their work and it is displayed in the classroom. Teachers and students work together to monitor progress toward class and course goals. During the week students and teachers will make a plan, do the plan, study how they did during the week and then decide on what actions they will take the next week to do even better.

We are looking forward to sharing our successes with you throughout the year!

What is CCI Level II?

This is an extension to the Continuous Classroom Improvement (CCI) process in which students keep personal data folders. Student data folders provide a way for students, teachers, and parents to keep track of student performance. Students take ownership and responsibility for their learning by setting individual goals and then track their own performance to determine progress. Some Harrison classrooms are implementing CCI Level II this year. All classrooms will be implementing Level II in the future.

CCI engages all students in the learning process to increase student achievement!

What are Harrison students saying about CCI?

- "CCI is fun!! I like it because we can pick our own strategies and we see which strategies really help us learn."
- "I think it helps us know what is going to happen and to help us figure out what doesn't help us learn so we can work that out."
- "I like CCI because it is fun for me to decide how I want to learn."
